You need to create a support bundle for your GitHub Enterprise Server instance with the hostname ghe.avocado.corp. What command should you use to create a support bundle?

- A. `ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz`

---

**Answer: A**

---

Explanation:

Run the `ghe-support-bundle` command over SSH on your appliance and redirect its output to a file.

For example:
